and the Treasury

*Hong Kong Special Administrative Region*

## **Foreword**

### **Realising opportunities of Green and Sustainable Finance**

It gives me great pleasure to join the United Nations Sustainable Investing & ESG Conference. When it comes to Green and Sustainable Finance, the Government has two strategic priorities – 1) To achieve carbon neutrality for Hong Kong by 2050; and 2) To develop Hong Kong into an international centre for Green Finance as supported by our country's 14th Five Year Plan.

Last year, the Government and our financial regulators jointly established the Green and Sustainable Finance Cross-Agency Steering Group. It provides strategic directions with a view to coordinating regulatory and market development efforts, showcasing our commitment to promoting Green and Sustainable Finance in Hong Kong. Since 2018, a total of US\$ 3.5 billion have been raised from 2 issuances of Government Green Bonds, and we are the pioneering Asian Government to have issued Green Bond of 30 year tranche, attracting orders more than seven times its issuance size. In May this year, we also launched the Green and Sustainable Finance Grant Scheme to encourage private sector participation, by subsidising eligible bond issuers and loan borrowers their debt issuance costs, and external review expenses.

We will continue to seize the unprecedented opportunities brought by Green and Sustainable Finance, and I am sure this conference will be an insightful and rewarding prelude to a greener and more sustainable future for all of us.

# Foreword

## Dr. Tientip Subhanij

Chief of Investment and Enterprise Development  
United Nations Economic and  
Social Commission for Asia and the Pacific  
(UNESCAP)

## Accelerating Sustainable Investment to Achieve the SDGs

For the past year and a half, the world's attention has been justifiably gripped by COVID-19. What began as a potential threat looming on the horizon quickly spread, with a devastating socio-economic impact felt worldwide. As the world gradually, but steadily, begins to emerge from the nadir of the pandemic, our collective attention now turns to the crucial task of rebuilding.

At the same time, however, it is important not to lose sight of the threat of climate change, which is manifesting itself far more slowly than COVID-19, but whose effects will be even more devastating. As a stark reminder, while the pandemic raged worldwide in 2020, the Earth experienced its second-hottest year since the start of record-keeping in 1880. The hottest year on record was 2016, and the third-hottest, 2019. As a result of these changes, the world now suffers five times more disasters than 50 years ago, with Asia accounting for nearly one-third of these disasters and almost half of the resultant deaths.

Thankfully, the private sector is now more than ever taking a leading role in combatting climate change, including through sustainable investment and green finance. Sustainable investment is growing at an impressive pace around the world. Private companies are recognizing that investing in the Sustainable Development Goals could unlock trillions of dollars in new market opportunities.

However, significant challenges remain. Even before COVID-19, the financing gap was \$2.5 trillion per year. We, therefore, need to mobilize commercial finance and private investment on a vast scale to achieve the SDGs, especially in Asia and the Pacific. To address this challenge, the public and private sectors need to work together, more closely than ever before.

UNESCAP is committed to promoting sustainability and ESG while connecting the public and private sectors to help our region accelerate SDG investments towards achieving the 2030 Agenda.

# Foreword

**Dr. William Yu**

Founder and Chief Executive Officer  
*World Green Organisation*

## Innovation on The Road to Net-Zero Economy

World Green Organisation (WGO) is pleased to collaborate, once again, with the UNESCAP to host the second Sustainable Investing Conference. It is an honor to obtain the unreserved support of the United Nations. We are also thankful for the generous support from our Conference Partners, the Financial Services Development Council (FSDC) and Hong Kong Exchanges and Clearing Limited (HKEX), for their efforts to propel the sustainable finance agenda in Hong Kong.

The COVID-19 pandemic has drastically changed the international community's approach towards the sustainable development challenges of our time. The pandemic revealed our vulnerabilities and exposed us to the harsh realities of the Anthropocene, a period in our planet's history where humans have drastically altered the planet's climate and ecosystems. Climate change and COVID-19 are both global problems and they are inter-related. We are experiencing how environmental degradation can have a substantial impact on social wellbeing and economic activity. Zoonotic diseases, such as, COVID-19 will continue to jump from animals to human populations as we destroy natural ecosystems and if we do not rethink our current agriculture, farming and forestry practices. As the ecosystems which we rely on collapse (in part due to human activity and climate change), the environmental services they provide will also diminish.

We need to act now. This is a once-in-a-lifetime opportunity to address the crisis, and Green Finance and Technology will be critical to a fostering an equitable and effective post-pandemic economic recovery. COVID-19 and climate change have another thing in common. They are both an opportunity and reason for us to come together to drive effective change that benefits all stakeholders. Whether it is improving workplace safety and wellness or transitioning our economy towards meeting the Paris Agreement targets, we need to innovate and cooperate. Hong Kong, as a world-leading financial center, is now at the forefront of the climate change discussion. Government officials, financial market participants, academics and civil society are coming together to create a paradigm shift in the role of finance and sustainable investing.

This year we have launched a coalition platform to engage corporations across Asia and facilitate the transition to TCFD (Task Force on Climate-related Financial Risk Disclosures) reporting standards. Furthermore, a green fund will be established and launched in this conference to support numerous smart city developments and demonstrate to investors and asset managers that ESG investing can effectively contribute to our city and planet. It is promising to see that the number of supporting organisations for this Conference has grown drastically. This is an opportunity for all stakeholders to come together and explore how Hong Kong can play its role in creating a net-zero global economy, and I hope we seize it!

# Background

## Concept note

### Background

The world we live in today is facing unprecedented socio-economic crisis resulting from the COVID-19 pandemic and impact of climate change, the Asia-Pacific region is no exception. Given this, we are at a defining moment where government officials and business leaders need to radically rethink how we make decisions. We need a sustainable path, where we put the planet and human well-being first, to be the main focus for countries to implement green and carbon neutral policies and sustainable investing in the recovery phase from the pandemic.

Accelerating support in the recovery effort in Asia and the Pacific will require significant resources and there is an increasing need to look across the role of both public and private players to effectively respond to the pandemic, climate change, and at the same time continue the progress to achieve the Sustainable Development Goals (SDGs). While governments will need to accelerate the much needed fiscal and monetary stimuli, the private sector will be critical in achieving the SDGs through leveraging their financial resources and innovation for sustainable development. The COVID-19 pandemic has highlighted the need to bring more financing to build back better towards a green and sustainable future. This forum underscores the importance of green and sustainable finance in the post-pandemic world, and one of the most significant growth opportunities in the capital markets is in green bonds. Global green bond and green loan issuance reached an adjusted USD 257.7 billion in 2019, a 51% increase from 2018 of USD 170.6 billion.

In this vein, following the successful organisation of the first meeting, the World Green Organisation (WGO) has partnered with the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP) once again to organise the second Sustainable Investing and ESG Conference in 2020/21 in Hong Kong. The Conference will gather policymakers and C Level representatives of private business, financial institutions, international organisations, family offices and foundations and other relevant stakeholders to discuss pressing issues in promoting climate-resilient investment to finance the SDGs.

## Objectives

Building on the previous successful engagement, WGO is organising the second Sustainable Investing and ESG Conference in 2020/21 in partnership with UNESCAP with the following objectives:

1. Propose innovative mechanisms to support the recovery effort from pandemic and increase sustainable investment;
2. Identify best practices for environmental, social and governance (ESG) investment, mainstreaming, accessing and leveraging finance for climate mitigation and adaptation as well as carbon neutral;
3. Demonstrate successful green projects supported by Green funds/bonds and showcase Eco-healthy technologies and applications to attain SDGs;
4. Develop a common understanding of the latest trends, successes and challenges with infrastructure financing, facilitate project matching between project proponents and potential investors;
5. Raise awareness about climate risks and sustainable investment and strengthen the capacity of stakeholders to develop an enabling policy environment that promotes public private partnerships.

# Organiser

## The United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP)

**The Economic and Social Commission for Asia and the Pacific (ESCAP)** is the most inclusive intergovernmental platform in the Asia-Pacific region. The Commission promotes cooperation among its 53 member States and 9 associate members in pursuit of solutions to sustainable development challenges. ESCAP is one of the five regional commissions of the United Nations.

The ESCAP secretariat supports inclusive, resilient and sustainable development in the region by generating action-oriented knowledge, and by providing technical assistance and capacity-building services in support of national development objectives, regional agreements and the implementation of the 2030 Agenda for Sustainable Development.

ESCAP pursues this objective by carrying out work, in close cooperation with other United Nations entities and intergovernmental organizations in the region, in the following areas:

**MACROECONOMIC  
POLICY AND FINANCING  
FOR DEVELOPMENT**

**TRADE, INVESTMENT &  
INNOVATION**

**TRANSPORT**

**ENVIRONMENT AND  
DEVELOPMENT**

## Organiser

### The United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP)

The United Nations Economic and Social Commission for Asia and the Pacific is the main legislative organ of ESCAP and reports to the Economic and Social Council (ECOSOC). It provides a forum for all governments of the region to review and discuss economic and social issues and to strengthen regional cooperation. The Commission meets annually at the ministerial level to discuss and decide on important issues pertaining to inclusive and sustainable economic and social development in the region, to decide on the recommendations of its subsidiary bodies and of the Executive Secretary, to review and endorse the proposed strategic framework and programme of work, and to make any other decisions required, in conformity with its terms of reference. The Commission session comprises a senior officials segment followed by a ministerial segment. The joint session of the Special Body on Least Developed, Landlocked Developing and Pacific Island Developing Countries, as called for in ESCAP resolution 69/1 on the conference structure of the Commission, is held during the senior officials segment.

## World Green Organisation (WGO)

The **World Green Organisation (WGO)** is an independent non-governmental organisation concerned with environmental conservation and environmentally related livelihood and economic affairs. It provides a holistic approach to a fully integrated three-pronged solution that combines social, environmental and economic aspects for a low carbon society.

Through science-based policy research and community projects, the WGO aims to enhance the quality of the environment, promote a greener economy, and improve people's livelihoods. In particular, it will focus on the social concerns of underprivileged groups and on the creation of a green economy, to help realise its vision of sustainable development.

The WGO has created a network of world-renowned experts in environmental protection, poverty alleviation and economic development. Our partnership enables us to promote green community and sustainable economic development together by transforming people's lifestyles and business best practices in developed and developing countries.

With active participation and contribution to United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP) as ESNB (Sustainable Business Network) task force members, World Green Organisation is honored to collaborate with the United Nations to organise the 2nd International Conference on Sustainable Investing and ESG in Hong Kong.

### Highlights of related work :

- ▶ Organised Training Workshops on Economic Social and Governance (ESG) and Sustainable Development Goals (SDGs) with UNESCAP, 2019
- ▶ Provided Chairmanship to the Judging Panel for the Best in ESG Award, BDO ESG Awards, 2019, 2018
- ▶ Provided ESG Advisory to renowned corporations, such as, Sa Sa International and Aeon Credit Service, 2017
- ▶ Conducted Stakeholder Engagement & Materiality Assessment for publicly listed company, Sa Sa International (members of Hang Seng Sustainability Index), 2016
- ▶ Offered training at ESG Reporting Seminar in collaboration with ADF Professional Development Committee (200 / 300 accountants, CFO & COO) 2016 / 2015
- ▶ Established WGO's Sustainable Business Award (SBA) based on ESG criteria, 2015 - present
- ▶ Provided Advisory to Crowe Horwath on Sustainability and Environment, Social and Governance (ESG) reporting, 2015
- ▶ Contributed a Case Study to United Nations Green Business Guide, 2015
- ▶ Built Green Office Awards Labelling Scheme (GOALS) with Eco-Healthy Label: 400 offices participated, including, ACCA, Asia Financial, Canon, Cisco, Citibank, DHL Express, Ernst & Young, Fuji Xerox, JP Morgan, KPMG, Octopus Cards, 2013 - present

## Conference Partner

### Hong Kong Exchanges and Clearing Limited

**Hong Kong Exchanges and Clearing Limited (HKEX)** is one of the world's major exchange groups, and operates a range of equity, commodity, fixed income and currency markets. HKEX is the world's leading IPO market and as Hong Kong's only securities and derivatives exchange and sole operator of its clearing houses, it is uniquely placed to offer regional and international investors access to Asia's most vibrant markets.

HKEX is also the global leader in metals trading, through its wholly owned subsidiaries, The London Metal Exchange (LME) and LME Clear Limited. This commodity franchise was further enhanced with the launch of Qianhai Mercantile Exchange (QME), in China, in 2018.

HKEX launched the pioneering Shanghai-Hong Kong Stock Connect programme in 2014, further expanded with the launch of Shenzhen Connect in 2016, and the launch of Bond Connect in 2017.

# Conference Partner

## Financial Services Development Council

**The Financial Services Development Council (FSDC)** was established in 2013 by the Hong Kong Special Administrative Region Government as a high-level, cross-sectoral advisory body to engage the industry in formulating proposals to promote the further development of financial services industry of Hong Kong and to map out the strategic direction for the development.

The FSDC has been incorporated as a company limited by guarantee with effect from September 2018 to allow it to better discharge its functions through research, market promotion and human capital development with more flexibility.

### **The FSDC aims to:**

- ▶ advise the Government on strategies and measures to expand the scope of the financial markets and enhance the competitiveness of Hong Kong as an international financial centre;
- ▶ support the financial services industry of Hong Kong in developing the core competence and knowledge of its practitioners; and
- ▶ promote the financial services industry of Hong Kong and Hong Kong as an international financial centre in the Mainland and overseas.
